

## Eco-Club

### February Newsletter

Our Eco-Warriors are involved in some exciting projects that are starting, this month.

### Greening Up Our Town Centre

One of these is Greening Up Our Town Centre. Some of our Year 5s and 6s won a competition to design a planting scheme for our new town centre and their posters will be displayed in shop windows, in the town, starting this week. Seeds and compost are starting to be delivered to school this week. All of the school will get the opportunity to grow the plants that the Eco-Warriors will plant, in silver Street, in the summer.

### Donations

I have been asked if anyone has any old crocs that they could donate to the project. They will be hung on the wall in the Green Dragon Yard and filled with plants.

### River Tees Sculpture

We also have a visitor from the Canal and Rivers Trust coming to talk to some Year 5s and the children will be going to the River Tees to take part in a litter pick.

After this, the children will be working with an artist and the Teesside Museums to create a huge sculpture of the River Tees, made from objects that could be found dumped in the river, that will be displayed at Kirkleatham Hall Museum. Our children will be invited to open this piece of work

We are all so excited about these projects.
